#### NEWS RELEASE

### **FOXPOINT RESOURCES EXTENDS HIGH GRADE ZONE ABOVE PREVIOUS MINING LIMITS IN SHAFT #3 WITH INTERSECTIONS UP TO 1.87 OZ/T AU OVER 7.8 FEET**

Foxpoint Resources Ltd. is pleased to announce the initial results from its ongoing underground drilling activities at its Kirkland Lake properties. Drilling has begun from the 3835 level at the Macassa Mine NE and NW of shaft #3. Past mining has taken place from the 7050 level to the 3835 level (over 3200 feet of plunge length). Significant intersections during the present exploration program are extending the ore body above the limits of previous mining towards surface. In the south vein zone, intercepts include **1.57 ounces per ton over 14.5 feet (6.6 feet TW, Hole 38-104)** at 380 feet vertically above the level. In the second, a parallel vein located some 80-120 feet to the north ('04 Break), results include **1.69 ounces per ton over 6.2 feet (3.8 feet TW, Hole 38-103)** at 240 feet, as well as visible gold (Hole 38-106) at 570 feet vertically above the level. The mineralization is open in all directions on both veins and is open up plunge for 3,500 feet. This potential plunge is one of the targets of the current drilling campaign.

#### **3835 LEVEL DRILL RESULTS (EAST END)**

Drilling underground has begun on the 3835 level at Macassa Mine to the east of the #3 shaft. The drilling has returned significant intersections above this level on two parallel veins. Five holes have been drilled above 3835 level up-plunge from the Macassa ore body where no previous drilling has taken place. To date, all five holes have intersected a quartz vein zone south of the targeted '04 Break. Four of the intersections contain visible gold. It has been drilled on roughly 100 foot centres, up to 380 feet vertically above the level, and over 120 feet horizontally. The south results include **1.57 ounces per ton over 14.5 feet (6.6 feet TW)** in hole 38-104. The mineralization is open in all directions. The '04 Break, one of the largest producing zones in the past, has returned **1.69 ounces per ton over 6.2 feet (3.8 feet TW)** at 240 feet, and visible gold at 570 feet vertically above the level. The mineralization is open above for 3,500 feet. Some of the better intersections are listed below.

DRILL HOLE No.	VEIN	FROM (feet)	TO (feet)	HOLE DIP (degrees)	AZIMUTH (degrees)	ASSAY (oz. per ton/feet) (T.W. = true width in feet)
38-90	SOUTH ZONE (29W)	506.2	507.7	18°	12°	3.07/1.5'= 1.1'TW VG
38-90	NEW ZONE (30W)	312.3	313.3	18°	12°	0.43/1.0'=0.7'TW
38-91	SOUTH ZONE (28W)	664.0	669.6	32°	19°	1.33/5.6'=3.4'TW
	INCLUDING	666.1	667.4	32°	19°	3.73/1.3'=0.8'TW
38-103	SOUTH ZONE (28W)	657.7	658.9	17°	16°	1.42/1.2'= 0.7'TW VG
	04 BREAK (27W)	769.8	776.0	17°	16°	1.69/6.2'= 3.8'TW VG
38-104	SOUTH ZONE (28W)	698.5	713.0	34°	19°	1.00/14.5' (cut) or 1.57/14.5' (uncut)= 6.6'TW VG
	INCLUDING	704.5	706.5	34°	19°	7.62/2.00'= 0.9'TW VG

### 3835 LEVEL DRILL RESULTS (WEST END)

#### 1.87 OZ/T AU OVER 7.8 FEET

Results to the west of the # 3 shaft have extended an existing above average grade ore block up 120 feet vertically to the 3835 level. Follow-up drilling is planned in order to follow the ore up towards surface (4200 feet above). The following table summarizes some of the better drill results.

DRILL HOLE No.	VEIN	FROM (feet)	TO (feet)	HOLE DIP (degrees)	AZIMUTH (degrees)	ASSAY (oz. per ton/feet) (T.W. = true width in feet)
38-81	04 BREAK (47W)	145.9	170.7	-82°	147°	1.87/24.8'=7.8'TW
	INCLUDING	160.9	161.6	-82°	147°	11.22/0.7'=0.2'TW
	INCLUDING	161.6	164.1	-82°	147°	6.89/2.5'=0.8'TW VG
38-83	04 BREAK (46W)	64.9	65.9	-63°	288°	0.26/1.0'=0.7'TW VG
38-86	04 BREAK (45W)	92.4	93.4	-72°	328°	1.31/1.0'=0.6'TW VG
38-95	04 BREAK (46W)	65.0	66.1	0°	342°	1.24/1.1'=1.1'TW VG
38-97	04 BREAK SPLAY (45W)	28.6	29.7	0°	301°	0.90/1.1'=1.0'TW
38-99	38 LEVEL (45W)	83.0	85.1	-72°	328°	7.40/2.1'=1.3'TW VG

T.W.= True Width V.G.=Visible Gold QV= Quartz Vein

"We have produced more than 12,000 ounces of gold since commencing production in May and are more than pleased with these first results from underground at Shaft #3," said Brian Hinchcliffe, the Company's President.

The results of the Company's drilling program have been reviewed, verified (including sampling, analytical and test data) and compiled by the Company's geological staff (which includes a 'qualified person' for the purpose of NI 43-101, *Standards of Disclosure for Mineral Projects*).

The Company has implemented a quality control program to ensure sampling and analysis of all exploration work is conducted in accordance with the best possible practices. The drill core is sawn in half with half of the core samples shipped to the Swastika Laboratories in Swastika, Ontario for analysis. The other half of the core is retained for future assay verification. Gold analysis is conducted by fire assay using atomic absorption or gravimetric finish. The laboratory re-assays at least 10% of all samples and additional checks may be run on anomalous values.

The Company purchased the Macassa Mine and 2,000 ton per day mill along with four contiguous former gold producing properties from Kinross Gold Corporation in December 2001. These properties - the Kirkland Lake Gold, Teck-Hughes, the Lake Shore and Wright-Hargreaves - together with the Macassa Mine, have produced approximately 22 million ounces of gold. Since the acquisition the Company's Geologic Team has compiled the large amount of existing information, processed it with state of the art software and planned a comprehensive Exploration Program. The underground drilling at # 3 Shaft is one of the main components of the Program.

The Company's Kirkland Lake properties are the subject of a report prepared by Roland H. Ridler, B.A.Sc.(hons.), M.A.Sc., Ph.D.(Econ.Geol.), P.D., entitled *Kirkland Lake Mineral Properties (Macassa Mine, Kirkland Lake Gold, Teck-Hughes, Lake Shore, Wright-Hargreaves* dated November 30, 2001. A copy of the report has been filed on SEDAR ([www.sedar.com](http://www.sedar.com) <<http://www.sedar.com>>) with the Company's Annual Information Form dated November 30, 2001.

## GENERAL INSTRUCTIONS

### A. Rule as to Use of Form 6-K

This form shall be used by foreign private issuers which are required to furnish reports pursuant to Rule 13a-16 or 15d-16 under the *Securities Exchange Act of 1934*.

### B. Information and Document Required to be Furnished

Subject to General Instruction D herein, an issuer furnishing a report on this form shall furnish whatever information, not required to be furnished on Form 40-F or previously furnished, such issuer

- (i) makes or is required to make public pursuant to the law of the jurisdiction of its domicile or in which it is incorporated or organized, or
- (ii) files or is required to file with a stock exchange on which its securities are traded and which was made public by that exchange, or
- (iii) distributes or is required to distribute to its securityholders.

The information required to be furnished pursuant to (i),(ii) or (iii) above is that which is material with respect to the issuer and its subsidiaries concerning: changes in business; changes in management or control; acquisitions or dispositions of assets; bankruptcy or receivership; changes in registrant's certifying accountants; the financial condition and results of operations; material legal proceedings; changes in securities or in the security for registered securities; defaults upon senior securities; material increases or decreases in the amount outstanding of securities or indebtedness; the results of the submission of matters to a vote of security holders; transactions with directors, officers or principal security holders; the granting of options or payment of other compensation to directors or officers; and any other information which the registrant deems of material importance to securityholders.

This report is required to be furnished promptly after the material contained in the report is made public as described above. The information and documents furnished in this report shall not be deemed to be "filed" for the purposes of Section 18 of the Act or otherwise subject to the liabilities of that section.

If a report furnished on this form incorporates by reference any information not previously filed with the Commission, such information must be attached as an exhibit and furnished with the form.

### C. Preparation and Filing of Report

This report shall consist of a cover page, the document or report furnished by the issuer, and a signature page. Eight complete copies of each report on this form shall be deposited with the Commission. At least one complete copy shall be filed with each United States stock exchange on which any security of the registrant is listed and registered under Section 12(b) of the Act. At least one of the copies deposited with the Commission and one filed with each such exchange shall be manually signed. Unsigned copies shall be conformed.

### D. Translations of Papers and Documents into English

Reference is made to Rule 12b-12(d). Information required to be furnished pursuant to General Instruction B in the form of press releases and all communications or materials distributed directly to securityholders of each class of securities to which any reporting obligation under Section 13(a) or 15(d) of the Act relates shall be in the English language. English versions or adequate summaries in the English language of such materials may be furnished in lieu of original English translations.

Notwithstanding General Instruction B, no other documents or reports, including prospectuses or offering circulars relating to entirely foreign offerings, need be furnished unless the issuer otherwise has prepared or caused to be prepared English translations, English versions or summaries in English thereof. If no such English translations, versions or summary have been prepared, it will be sufficient to provide a brief description in English of any such documents or reports. In no event are copies of original language documents or reports required to be furnished.
